

execute\_impl

```
doris::vectorized::  
FunctionBinaryToType  
< DataTypeString, DataTypeString,  
Impl, Name >::execute_inner_impl
```

get\_name

The diagram shows two arrows pointing to the 'get\_name' box. One arrow originates from the 'execute\_impl' box and points to the top of the 'get\_name' box. The other arrow originates from the right side of the large box containing the code snippet and points to the bottom of the 'get\_name' box.
