/union\_source\_operator.h

```
graph BT; A["/Users/dabowang/doris<br>/be/src/pipeline/exec<br>/union_source_operator.cpp"] --> C["/Users/dabowang/doris<br>/be/src/pipeline/exec<br>/union_source_operator.h"]; B["/Users/dabowang/doris<br>/be/src/pipeline/pipeline<br>_fragment_context.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: /Users/dabowang/doris/be/src/pipeline/exec/union\_source\_operator.h. Below it are two white boxes representing source files. The left box is /Users/dabowang/doris/be/src/pipeline/exec/union\_source\_operator.cpp, and the right box is /Users/dabowang/doris/be/src/pipeline/pipeline\_fragment\_context.cpp. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.
