doris::vectorized::
SubReplaceFourImpl::
execute_impl

replace_execute

```
graph LR; A[doris::vectorized::SubReplaceThreeImpl::execute_impl] --> C[replace_execute]; B[doris::vectorized::SubReplaceFourImpl::execute_impl] --> C;
```

The diagram illustrates a common function call. Two source functions, 'doris::vectorized::SubReplaceThreeImpl::execute_impl' and 'doris::vectorized::SubReplaceFourImpl::execute_impl', are shown in white boxes on the left. Blue arrows from both boxes point to a single gray box on the right labeled 'replace_execute', indicating that both source functions call this common target function.
