NGramBloomFilterIndexWriter
Impl::finish

doris::segment_v2::
TypedZoneMapIndexWriter
::finish

init

```
graph LR; A["doris::segment_v2::NGramBloomFilterIndexWriterImpl::finish"] --> C["init"]; B["doris::segment_v2::TypedZoneMapIndexWriter::finish"] --> C;
```

The diagram illustrates a control flow where two different finish methods from the doris::segment_v2 namespace converge on a single init method. The first method is from the NGramBloomFilterIndexWriterImpl class, and the second is from the TypedZoneMapIndexWriter class. Both are represented in white boxes with black borders, while the target 'init' method is in a gray box.
