

strict\_autodigit\_less  
::operator()

strict\_autodigit\_greater  
::operator()

StrictAutoDigitLessThan

```
graph LR; A[strict_autodigit_less::operator()] --> C[StrictAutoDigitLessThan]; B[strict_autodigit_greater::operator()] --> C;
```

The diagram illustrates a relationship between two operator functions and a class. On the left, there are two white rectangular boxes. The top box contains the text 'strict\_autodigit\_less' followed by '::operator()' on the next line. The bottom box contains 'strict\_autodigit\_greater' followed by '::operator()' on the next line. Blue arrows point from the right side of each of these boxes to a single gray rectangular box on the right. This gray box contains the text 'StrictAutoDigitLessThan'.
