

doris::AcceptNullPredicate
::evaluate_vec

doris::SingleColumnBlock
Predicate::evaluate_vec

evaluate_vec

```
graph LR; A[doris::AcceptNullPredicate::evaluate_vec] --> C[evaluate_vec]; B[doris::SingleColumnBlockPredicate::evaluate_vec] --> C;
```

The diagram illustrates a relationship between two source functions and a target function. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::AcceptNullPredicate' followed by '::evaluate_vec' on a new line. The bottom box contains the text 'doris::SingleColumnBlock' followed by 'Predicate::evaluate_vec' on a new line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top of a gray rectangular box on the right. The arrow from the bottom box points to the bottom of the same gray box. The gray box contains the text 'evaluate_vec'.
