```

```
create_aggregate_function  
_sequence_base
```

```
is_date_v2
```

```
graph LR; A[doris::vectorized::CurrentDateFunctionBuilder::build_impl] --> C[is_date_v2]; B[create_aggregate_function_sequence_base] --> C;
```

The diagram illustrates a mapping or inheritance relationship. Two source functions, 'doris::vectorized::CurrentDateFunctionBuilder::build_impl' and 'create_aggregate_function_sequence_base', are shown in white boxes on the left. Blue arrows point from each of these boxes to a single target function, 'is_date_v2', which is shown in a gray box on the right.
