

/Users/dabowang/be  
\_all/vec/common/int\_exp.h

```
graph TD; A["/Users/dabowang/be_all/vec/common/int_exp.h"] --> B["cstdint"]; A --> C["limits"]; A --> D["utility"];
```

The diagram illustrates a directory structure where a header file, `int_exp.h`, is located at `/Users/dabowang/be_all/vec/common/`. Three blue arrows originate from the bottom of the header file box and point to three separate boxes below it, labeled `cstdint`, `limits`, and `utility`. This suggests that these three files are part of a library or module that implements the functions declared in `int_exp.h`.

cstdint

limits

utility
