

get\_cache\_size

```
graph LR; A[get_cache_size] --> B["doris::io::IFileCache::LRUQueue::get_total_cache_size"]
```

The diagram illustrates a function call. On the left, a gray rectangular box contains the text 'get\_cache\_size'. A blue arrow points from this box to a larger white rectangular box on the right. This right box contains the text 'doris::io::IFileCache::LRUQueue::get\_total\_cache\_size', which represents the specific implementation or method being called.

doris::io::IFileCache  
::LRUQueue::get\_total  
\_cache\_size
