

/Users/dabowang/doris  
/be/src/http/action/check  
\_tablet\_segment\_action.h

```
graph BT; A["/Users/dabowang/doris  
/be/src/http/action/check  
_tablet_segment_action.cpp"] --> C["/Users/dabowang/doris  
/be/src/http/action/check  
_tablet_segment_action.h"]; B["/Users/dabowang/doris  
/be/src/service/http  
_service.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a header file box (shaded gray) containing the path `/Users/dabowang/doris/be/src/http/action/check_tablet_segment_action.h`. Below it are two source file boxes (white with black borders). The left box contains `/Users/dabowang/doris/be/src/http/action/check_tablet_segment_action.cpp` and the right box contains `/Users/dabowang/doris/be/src/service/http_service.cpp`. Two blue arrows point from the source files up to the header file, indicating that both source files include this header.

/Users/dabowang/doris  
/be/src/http/action/check  
\_tablet\_segment\_action.cpp

/Users/dabowang/doris  
/be/src/service/http  
\_service.cpp
