

doris::vectorized::  
HashJoinNode::init

doris::vectorized::  
VNestedLoopJoinNode::init

init

```
graph LR; A["doris::vectorized::HashJoinNode::init"] --> D["init"]; B["doris::vectorized::VNestedLoopJoinNode::init"] --> D;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left contain the names of initialization functions: 'doris::vectorized::HashJoinNode::init' (top) and 'doris::vectorized::VNestedLoopJoinNode::init' (bottom). Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right labeled 'init'.
