

doris::vectorized::  
MurmurHash3Impl::execute

doris::vectorized::  
MurmurHash2Impl64::execute  
\_string

check\_and\_get\_column  
\_const\_string\_or\_fixedstring

```
graph LR; A[doris::vectorized::MurmurHash3Impl::execute] --> C[check_and_get_column_const_string_or_fixedstring]; B[doris::vectorized::MurmurHash2Impl64::execute_string] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. Two light gray boxes on the left represent the source functions: 'doris::vectorized::MurmurHash3Impl::execute' (top) and 'doris::vectorized::MurmurHash2Impl64::execute\_string' (bottom). Two blue arrows point from these boxes to a single dark gray box on the right, which represents the target function: 'check\_and\_get\_column\_const\_string\_or\_fixedstring'.
