

/Users/dabowang/be  
\_all/exec/schema\_scanner  
/schema\_tables\_scanner.h

```
graph BT; A["/Users/dabowang/be_all/exec/schema_scanner.cpp"] --> C["/Users/dabowang/be_all/exec/schema_scanner/schema_tables_scanner.h"]; B["/Users/dabowang/be_all/exec/schema_scanner/schema_tables_scanner.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: /Users/dabowang/be\_all/exec/schema\_scanner/schema\_tables\_scanner.h. Below it are two white boxes representing source files. The left box is /Users/dabowang/be\_all/exec/schema\_scanner.cpp and the right box is /Users/dabowang/be\_all/exec/schema\_scanner/schema\_tables\_scanner.cpp. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.
