

/Users/dabowang/be
_all/pipeline/exec/scan
_operator.h

```
graph BT; A["/Users/dabowang/be_all/pipeline/exec/scan_operator.cpp"] --> C["/Users/dabowang/be_all/pipeline/exec/scan_operator.h"]; B["/Users/dabowang/be_all/pipeline/pipeline_fragment_context.cpp"] --> C;
```

This diagram illustrates the relationship between three source files. At the top is a header file, `_operator.h`, which is included by two other files below it. The left file is `_operator.cpp` and the right file is `_fragment_context.cpp`. Both source files have the same directory path as the header file: `/Users/dabowang/be_all/pipeline/exec/`. Blue arrows point from each source file to the header file, indicating the inclusion relationship.
