

doris::FlushToken::
submit

doris::FlushToken::wait

Error

```
graph LR; A[doris::FlushToken::submit] --> C[Error]; B[doris::FlushToken::wait] --> C;
```

The diagram illustrates a flow where two distinct operations, 'doris::FlushToken::submit' and 'doris::FlushToken::wait', both lead to a common 'Error' state. The 'submit' operation is represented in a box above the 'wait' operation, and both have blue arrows pointing towards a gray box labeled 'Error' on the right.
