

doris::vectorized::  
ColumnArray::protect

doris::vectorized::  
ColumnNullable::protect

protect

```
graph LR; A[doris::vectorized::ColumnArray::protect] --> C[protect]; B[doris::vectorized::ColumnNullable::protect] --> C;
```

The diagram illustrates a relationship between two source functions and a common target function. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'doris::vectorized::ColumnArray::protect' and the bottom box contains 'doris::vectorized::ColumnNullable::protect'. On the right, there is a gray rectangular box with the text 'protect'. Two blue arrows originate from the right side of the top box and the right side of the bottom box, both pointing towards the left side of the gray box, indicating that both source functions call or utilize the 'protect' function.
