

doris::segment_v2::
RlePageBuilder::add

doris::segment_v2::
NullBitmapBuilder::add_run

Put

```
graph LR; A["doris::segment_v2::RlePageBuilder::add"] --> C[Put]; B["doris::segment_v2::NullBitmapBuilder::add_run"] --> C;
```

The diagram illustrates a data flow where two distinct functions from the `doris::segment_v2` namespace converge on a single `Put` operation. The top function, `RlePageBuilder::add`, and the bottom function, `NullBitmapBuilder::add_run`, both have arrows pointing to the `Put` node on the right.
