

doris::segment\_v2::  
BinaryPlainPageBuilder::add

doris::segment\_v2::  
BinaryPlainPageDecoder  
::next\_batch

validate

```
graph LR; A["doris::segment_v2:: BinaryPlainPageBuilder::add"] --> C[validate]; B["doris::segment_v2:: BinaryPlainPageDecoder::next_batch"] --> C;
```

The diagram illustrates a flow where two different functions from the doris::segment\_v2 namespace point to a common validate function. The first function, BinaryPlainPageBuilder::add, is located in the top box. The second function, BinaryPlainPageDecoder::next\_batch, is located in the bottom box. Both functions have blue arrows pointing to the validate function, which is represented by a gray box on the right.
