

doris::StreamLoadAction
::handle

doris::StreamLoadAction
::on_header

prepare_stream_load
_record

```
graph LR; A[doris::StreamLoadAction::handle] --> C[prepare_stream_load_record]; B[doris::StreamLoadAction::on_header] --> C;
```

The diagram illustrates a flow where two distinct functions, `doris::StreamLoadAction::handle` and `doris::StreamLoadAction::on_header`, both point to a single target function, `prepare_stream_load_record`. The source functions are contained within white rectangular boxes, while the target function is in a gray rectangular box. Blue arrows indicate the direction of the flow from the source functions to the target.
