

execute_compaction

prepare_compaction
_and_calculate_permits

set_last_base_compaction
_failure_time

```
graph LR; A[execute_compaction] --> C[set_last_base_compaction_failure_time]; B[prepare_compaction_and_calculate_permits] --> C;
```

The diagram illustrates a flow where two separate functions, 'execute_compaction' and 'prepare_compaction_and_calculate_permits', both point to a single target function, 'set_last_base_compaction_failure_time'. The target function is highlighted with a gray background, while the source functions have white backgrounds. Blue arrows indicate the direction of the flow from left to right.
