NGramBloomFilterIndexWriter
Impl::finish

doris::segment_v2::
TypedZoneMapIndexWriter
::finish

finish

```
graph LR; A[doris::segment_v2::NGramBloomFilterIndexWriterImpl::finish] --> D[finish]; B[doris::segment_v2::TypedZoneMapIndexWriter::finish] --> D;
```

The diagram illustrates two separate function calls that both lead to a common 'finish' operation. The first call is from `doris::segment_v2::NGramBloomFilterIndexWriterImpl::finish`, and the second is from `doris::segment_v2::TypedZoneMapIndexWriter::finish`. Both are represented by white boxes with black borders. Blue arrows point from each of these boxes to a single gray box labeled 'finish' on the right.
